Implementing NFPA 3000™ (PS)

Standard for an Active Shooter / Hostile Event Response (ASHER) Program
Need for Guidance Leads to New Standard
Active Shooter Incidents

2000-2017
- 250 Incidents
- 2,217 Casualties

2016 & 2017
- 50 Incidents
- 943 Casualties

Locations
- Commerce 43%
- Education 22%
- Open Space 13%
- Government 11%
- Residences 5%
Active Shooter Incidents

- 2016 & 2017: 50 incidents, 943 casualties

Locations:
- Commerce: 43%
- Education: 22%
- Open Space: 13%
- Government: 11%
- Residences: 5%

Map showing the distribution of active shooter incidents across the United States.

- One incident
What Does NFPA 3000™ (PS) Do?

**Does**
- Provide resources for community leaders
- Offer tools to help **plan for, respond to, and recover from** these events

**Does Not**
- List prevention tips
- Detail local tactics
4 Main Concepts

- Whole Community
- Unified Command
- Integrated Response
- Planned Recovery

NFPA 3000™ (PS)
Concept 1: Whole Community

Everyone has a role to play
Concept 2: Unified Command

- EMS
- Fire
- Unified Command
- Law Enforcement
- Location Representative
Concept 3: Integrated Response

How do you achieve an integrated response?

Shared Knowledge + Competencies
Concept 3: Integrated Response

Law Enforcement Competencies

• Knowledge Based on Tasks and Competencies
• Federal, State, and Local Requirements
• Threat-Based Medical Care

Fire/EMS Competencies

• Tasks by Zone
• Integration with Law Enforcement Responders
• Competencies (Shooter, Vehicle, IED, Fire)
Concept 3: Integrated Response
Incident Response Zones
Personal Protective Equipment Requirements

Law Enforcement (All Zones)
- Ballistic Vest
- Identifiable garment
- Means of communication

Fire/EMS (Warm and Hot Zones)
- Ballistic Vest
- Identifiable garment
- Means of communication
Concept 4: Planned Recovery

When should the recovery process start when it comes to an active shooter / hostile event?

- As soon as an incident begins
- After an incident is over
- 24 hours after an incident is over
- Today
As soon as an incident begins
After an incident is over
24 hours after an incident is over

Recovery starts TODAY

Today
ASHER Program
Facility Readiness

- Identify Facility Characteristics
- Create an Emergency Action Plan
- Share Your Plan to Integrate it with Others
- Develop Plans for Notification and Exercise
Communications Center Support

Interoperability

Coordination

Relationships
Warning, Notification, & Crisis Communications

ALERT:
BALLISTIC MISSILE THREAT INBOUND TO HAWAII. SEEK IMMEDIATE SHELTER. THIS IS NOT A DRILL.

KEY:
- Direct lines of communication (responders, facility, and dispatch)
- Indirect lines of communication (victims, witnesses, and associated parties)

Visit www.nfpa.org/3000news for more information.
Receiving Hospitals

- Communications
- Victim Identification
- Facility Security
- Recovery Integration
Receiving Hospitals
Phases of Recovery

- Immediate Recovery
- Early Recovery
- Continued Recovery
How Does this Affect Door Security & Safety?

Chapter 9 Facility Preparedness

Evacuation  Relocation  Secure-in-place

Comply with requirements of NFPA 101®

Call to Action: Plan, Prepare & Implement
Learn more about NFPA 3000™ and how to get involved in the standards development process.

DSSF and NFPA 3000 3000™ (PS)

DSSF agrees with NFPA that we all have a role to play in addressing hostile events. It's not up to one person or agency to get the word out about the preparation, response and recovery strategies in NFPA 3000™ (PS).

DSSF hosted this webcast with that collaboration in mind.
STORY DRIVEN | REAL LIFE CASE STUDIES | EXPERT INSIGHTS | VALUABLE TOOLS
Call to Action: Plan, Prepare & Implement

**STEP 1**
Learn more about NFPA 3000™ (PS) and how to get involved in the standards development process.

**STEP 2**
Identify and implement the components that are relevant in your community.

**STEP 3**
Visit nfpa.org/3000news to access resources, information, and knowledge.
